

# ALBANY AND CARBON COUNTIES

# WYOMING REGION 3 HAZARD MITIGATION PLAN PUBLIC COMMENT

**Hazard mitigation** involves actions to reduce or eliminate long-term risks from hazards like wildfires, floods, and storms. It's an investment in community safety and sustainability, **returning \$6 for every \$1 spent**.

Communities must have a hazard mitigation plan to qualify for mitigation grant funding. These plans must be updated every five years. Region 3's communities began the planning process in 2024 and are excited to share the new 2025 update.

## HOW TO GET INVOLVED

Scan the QR code or visit the link below to review the draft plan and provide us with your comments and ideas:
